September 11, 2001

Remembering

In the months that followed, there would be time to reflect on a day gone so awry, but the morning of September 11, 2001 left only time to act. GSA Federal Protective Service (FPS) Officer Henry Acker was in his office at 26 Federal Plaza when the first plane struck the World Trade Center, about eight blocks away. Within seconds he and other members of the FPS were rushing to the site. When Acker arrived he found a war zone.

FPS officers Greg Ponomarev, Jaime Valentin, Franz Kippes, Kenny Benjamin, Rafael Bou, Ray Gauvin, Donald Kornegay, Richard Matos, Carlos Ortiz, and Duane Susi were also among the FPS contingent that responded and were helping the Port Authority Police evacuate the PATH rail station and Trade Center concourse. Officer Valentin was with a group of officers that entered the lower level between the two towers and began directing people who were "just going all over the place."

Officer Acker was on the Trade Center plaza when large pieces of debris started falling around him. He received a gash on his arm and felt something hit his back. Although wounded himself, he stayed with an injured pedestrian until the EMS arrived. Acker then returned to his office to help coordinate posts as FPS officers were deployed to various Federal facilities in the city to help with evacuations and secure the buildings.

Officer Valentin was on the lower level of the towers as the south tower started coming down. "I got trapped," Valentin remembers. He started getting hit with falling debris. "A piece of metal got wedged in my shin," he said. His elbow was also burned. Valentin was struggling to breathe and see in the thick dust. "Two police officers got me out of there. As we ran, the tower collapsed. I fell on the floor, and I don't even remember going from wherever we were on the lower level to wherever it was that we exited." Soon after, unable to see because he was in a cloud of dust, he fell down a flight of subway stairs. Afterward, he would receive ten stitches in his lower left leg. A woman poured water over his soot-covered face to clear his eyes. Later, he discovered that *New York Daily News* photographer Susan Watts had captured that moment when he spotted his picture for sale in a New York photo gallery.

Many other men and women from GSA acted with courage and clear-headedness. Federal buildings in the city were evacuated and secured, floor-by-floor searches conducted, and children in a GSA childcare center were moved to safety. Federal buildings in the city were evacuated within half an hour, including approximately 10,000 employees and visitors from the 40-story Federal Plaza.

Unable to see
because he
was in a cloud
of dust,
he fell down
a flight of
subway stairs.

The Alexander Hamilton U.S. Custom House on lower Broadway, the closest Federal building to the Trade Center, was made a refuge for the fleeing public. A nurse established a triage point and examined anyone suffering from respiratory difficulties. EMS was called for one woman who was nearing full term of her pregnancy and showing signs of distress.

At the downtown Federal facilities, all of the air-handling systems were shut down to prevent the intake of air-borne particles. By Friday, September 14, structural engineers had assessed the integrity of all of GSA's lower Manhattan facilities, along with the Federal Bureau of Prisons' Metropolitan Correctional Center. All were determined to be sound.

In the days and nights following September 11, GSA maintained an office in lower Manhattan to provide unbroken support for Federal agencies. Another crew worked around the clock at Pier 90, with the Federal Emergency Management Agency's (FEMA) Disaster Field Office. They provided a wide range of supplies and services for several Federal agencies, and various New York City municipal and state entities, including the Forest Service's Search and Rescue team, the Federal Bureau of Investigation, the Secret Service, and the New York City Fire Department.

GSA's Northeast and Caribbean Region held a ceremony on December 20, to recognize the efforts of 400 associates and GSA contractors. FPS Officers Henry Acker, Jaime Valentin, and Franz Kippes, who was also injured, had been honored at an earlier ceremony. After receiving an award for valor, the three officers were given a chance to speak. But as each one stood before friends and coworkers, only tears would come.

Emergency Support

All across the country, GSA associates were put on alert to support the relief effort in New York and the Pentagon. When they began, it was at best chaotic. There were scores of items to locate and buy, including vehicles, assorted hardware, construction equipment, thousands of protective suits, masks, gloves, and respirators. In addition, hundreds of hotel rooms were located for the emergency workers. Requisitions also came in for newspaper ads, aerial photography, x-ray machines, bomb sniffing dogs, translation services, portable office trailers, electrical generators for field lighting, and sadly, hundreds of 5' x 9' burial flags. Over the next several weeks, many GSA associates from across the country traveled to New York City to help support the recovery operations.

As a result of the attack on the Twin Towers, the Federal community in lower Manhattan lost over 900,000 square feet of office space, including the Customs Service's offices at the World Trade Center, which were completely destroyed. GSA succeeded in finding space not only for the displaced agencies, but also for the investigative agencies and for 2,000 National Guardsmen. Additionally, over 600,000 square feet of space was located for FEMA operations.

Front row, left to right: FPS Officers Franz Kippes; Jaime Valentin; Henry Acker.

Back row, left to right: Former GSA Chief of Staff Brain Jackson; Richard Yamamoto, FPS Criminal Intelligence and Investigations Division; John Ulianko, FPS Regional Director; GSA Administrator Stephen Perry.

The attack also destroyed an estimated 11,690 GSA-administered local telephone lines. GSA associates quickly acquired 600 cellular phones and 400 analog telephone sets for temporary use. They worked to coordinate repair efforts with the four communications companies serving the Federal community in Manhattan. GSA personnel installed Ground Zero communications for the Fire Department and the U.S. Army Corps of Engineers. They also set up communications for the Fire Department Counseling Centers.

In the Midst

GSA's Mid-Atlantic regional headquarters in Philadelphia was in a strategic position to render support to both New York and the Pentagon. Amid the chaos, the Secret Service's New York office lost its entire fleet of vehicles and called upon GSA to supply 100 vehicles on an emergency basis. The request was fulfilled within one hour.

Regional associates also worked on a request from FEMA for hotel and meeting space in Edison, NJ. Excess and refurbished office furniture was screened for availability and time frames for delivery were checked. Numerous commercial partners contacted GSA to offer assistance, expedite shipments, and make emergency requests first priority.

Over 2,000 GSA office startup kits were assembled and in place for arriving Defense Department staff. Each kit included diskettes, staplers, notepaper, pens, pencils, re-positional notes and other basic office supplies. One official stated, "GSA knows what we need before we even think of it." Within 48 hours, 1,000 pieces of furniture were moved into Pentagon swing space in Virginia and 3,200 offices for headquarter components of the Army, Navy and Air Force, were up and running. Within one week's time, the Pentagon employees were back to work performing their vital mission of national defense.

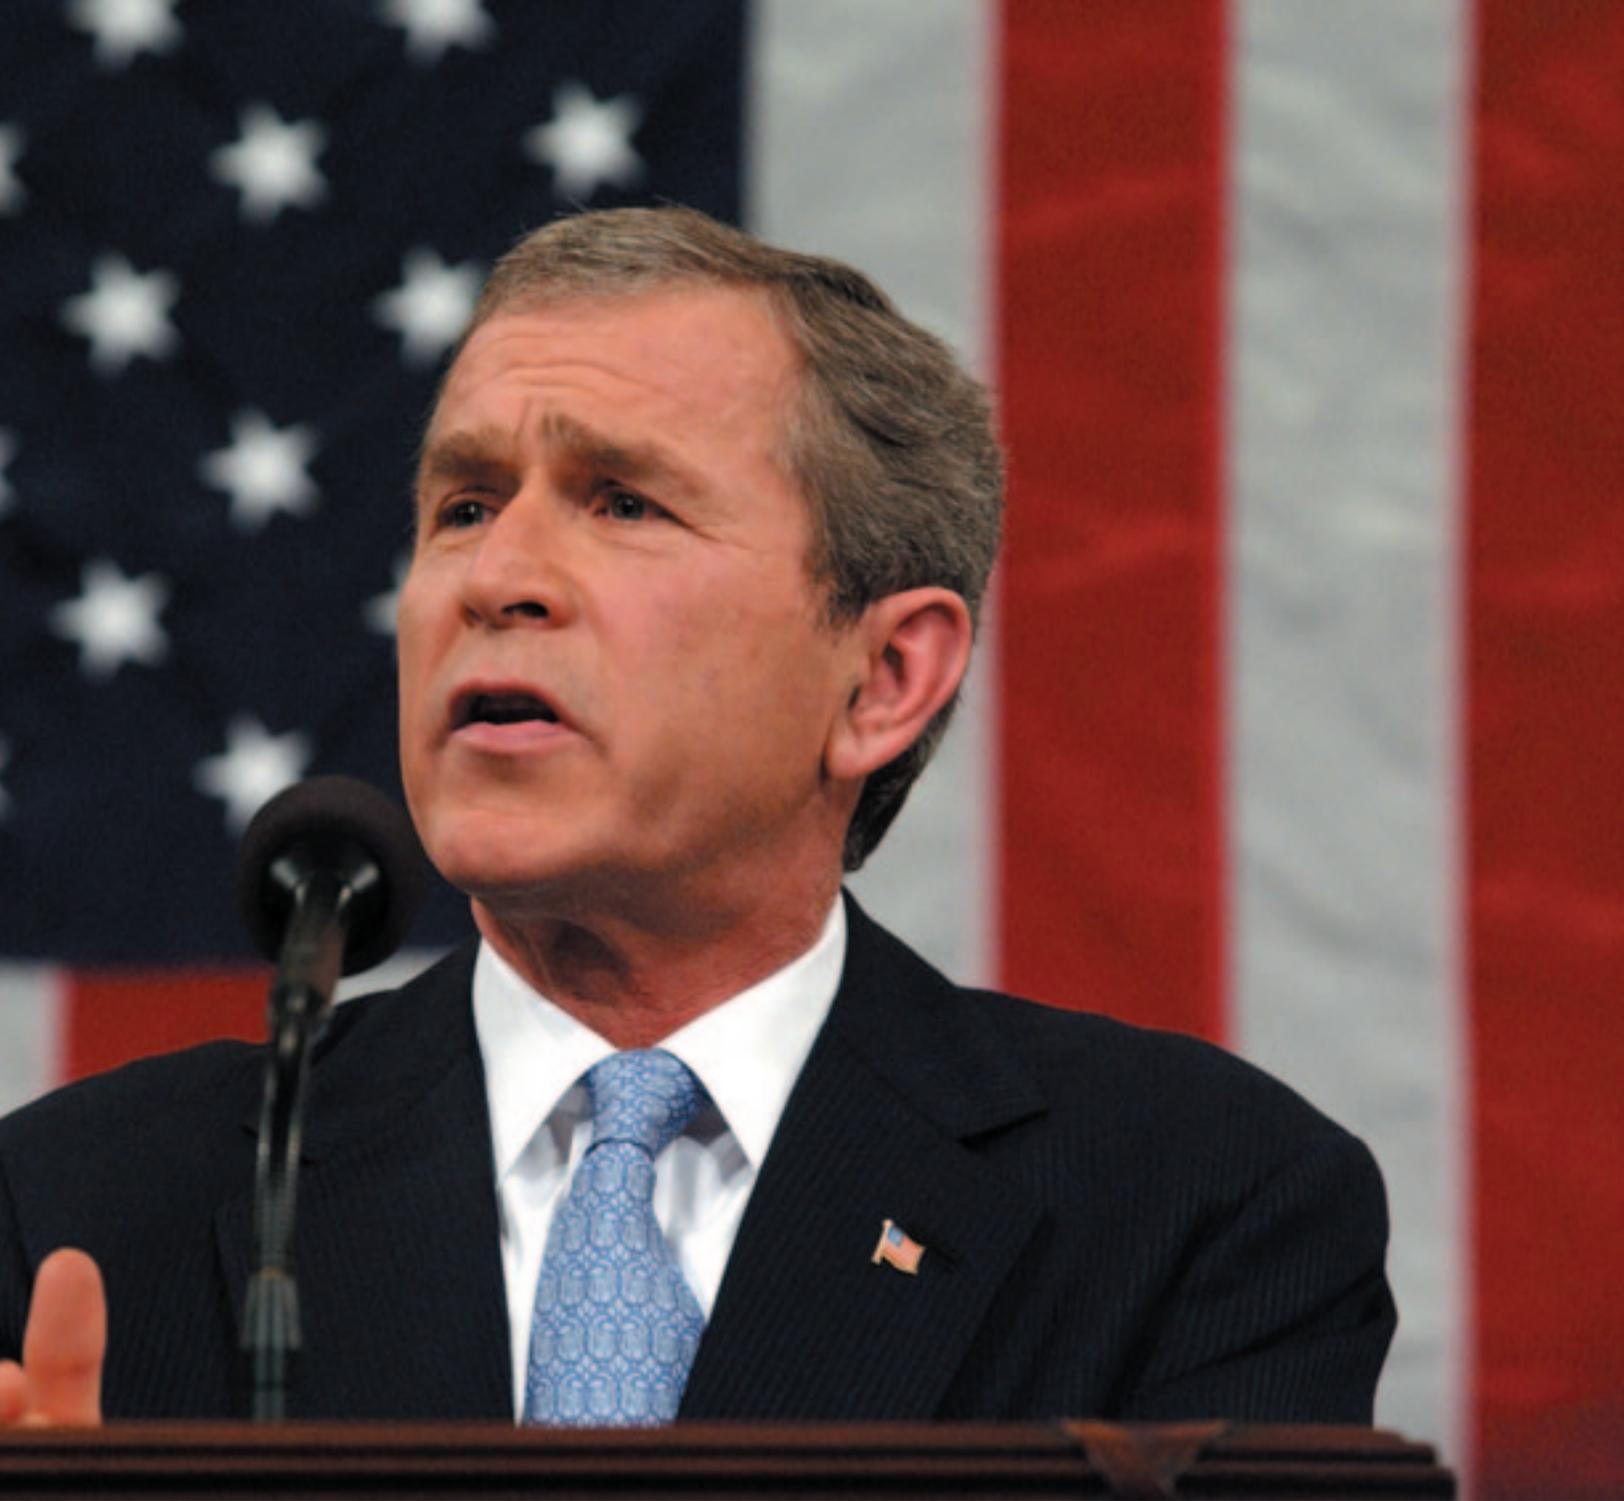

A few days later, another urgent request was received to relocate and set up new executive offices at two locations in Washington, D.C. In two hours GSA delivered 1,000 storage boxes, three associates, and packing supplies. Working around the clock, GSA associates got these offices up and running within 48 hours.

The U.S. Forest Service also called on GSA to provide equipment and materials for firefighters at the Trade Center complex. Emergency crews worked over the weekend and arranged for next-day delivery to New York. GSA associates in Fort Worth, TX, Burlington, NJ and Stockton, CA coordinated the effort to ensure that the requested supplies — everything from ready-to-eat meals to firefighters' gloves — were provided where and when they were needed.

**President Bush, sporting
a GSA supplied lapel pin

Union Address, January
29, 2002**

Photo Credit:
White House Photo by Eric Draper

Throughout the crisis, GSA actively supported both disaster relief and mobilization efforts. In the first few days, thousands of items were shipped including plastic gloves, dust masks, entrenching tools, blankets, first aid kits, safety glasses, helmets, and a variety of office and cleaning supplies.

One of the most visible items GSA furnished was flag lapel pins for the White House. President Bush and various Cabinet Officers have been wearing these pins since September of last year.

Improving Our Response

Though we are proud of our response in the face of such devastation, GSA leadership has assessed our response to the events of September 11, 2001. As a result, our Mid-Atlantic region has implemented a number of measures to ensure the most efficient response to any challenge.

- GSA's Federal Technology Service (FTS) can now issue Government Emergency Telephone Service (GETS) Cards. The cards enable essential personnel to effectively communicate, avoiding the problems encountered on 9/11 when telephone communication was almost completely shut down.
- Key GSA contract personnel will have emergency access to Government installations by issuing special identification cards that expedite emergency deliveries of supplies and furniture.
- A Federal agency contact list has been prepared enabling GSA to reach other Federal agencies in order to quickly identify and gather excess personal property.
- Customer Service staff has been put on alert to ensure immediate response to all customer requests for products and services.
- A CD version of the GSA Customer Supply Catalog has been prepared for customers unable to connect to the Internet and unable to access the printed edition.
- An Emergency Response list has been established of carriers who commit to responding around the clock, with no exceptions.
- Fulfill requests for vehicles for many agencies that need them as a result of their security responsibilities.

In addition:

- The Northeast Distribution Center is employing a variety of new technologies to ensure that they are able to continue their operations in the event traditional communication systems are not available.
- A list of corporate partners who can provide complete office or dormitory setups on a quick ship basis has been created.
- A dedicated team has been created to respond to high priority/emergency Defense Department requests at GSA's National Furniture Center.
- A catalog of items and services has been compiled, which would assist customer agencies in preparing for homeland security requirements or in responding to emergencies and natural disasters

...we are proud of our ability to respond quickly and effectively in the face of devastation...we have made improvements to ensure the most efficient response.

From the Ground Up

In response to the September 11th attacks, and in an effort to prevent future attacks, President Bush has proposed the formation of the Department of Homeland Security.

Led by Governor Tom Ridge of Pennsylvania, the proposal would restructure and combine a number of Federal organizations in an attempt to focus resources within the Federal government and ultimately enhance our nation's security. The mission of the proposed organization is as follows:

- Prevent terrorist attacks within the US
- Reduce America's vulnerability to terrorism
- Minimize the damage and recover from the attacks that do occur
- Mobilize and focus the resources of the Federal Government, state and local governments, the private sector and the American people to accomplish its mission.

To accomplish these goals, the following four organizations will be created:

Border and Transportation Security

It would include in its design the Immigration and Naturalization Service, Customs Service, Animal and Plant Health Inspection Service, Coast Guard, Federal Protective Service, and Transportation Security Administration. These organizations would work together under one umbrella to secure our Nation's borders, waterways and transportation systems by regulating the traffic moving through them.

President George W. Bush announces the Homeland Security Strategy as Vice President Cheney and Governor Ridge stand beside the President during a Rose Garden press conference on July 16th of this year.

Emergency Preparedness and Response

This arm of the Department would bring together a number of organizations including the Federal Emergency Management Agency (FEMA), Nuclear Incident Response, Domestic Emergency Support Team, Office of Domestic Preparedness, and the National Domestic Preparedness Office. Relying heavily on the existing structure of FEMA, this new organization would coordinate disaster response planning, response efforts, and prevention.

Chemical, Biological, Radiological and Nuclear Countermeasures

Using a combination of Civilian Biodefense Research Programs, The National BW Defense Analysis Center, and The Plum Island Animal Disease Center, this organization would lead the efforts in preparing for and responding to the full range of terrorist threats involving weapons of mass destruction.

Information Analysis and Infrastructure Protection

With The Critical Infrastructure Assurance Office, The Federal Computer Incident Response Center, The National Communications System, The National Infrastructure Protection Center, and The National Infrastructure Simulation and Analysis Center all on board, this organization would identify and assess current and future threats to the country, assess our vulnerabilities and make recommendations for preventative action.

GSA — Every Step of the Way

If the President's proposal is accepted, all the organizations involved will face numerous challenges through the initial setup and re-organization process. As with any new organization, there are obstacles to overcome and initial tasks to accomplish. GSA offers a number of products and services to support new agencies and we are gearing up to render support in their initial setup and ultimate mission.

Human Resources and EEO Services

GSA Schedule Number 738 X

GSA can provide agencies with services to hire, manage and maintain personnel and positions.

General Support Services

Special Item Number (SIN) 595 21

Includes Planning; Recruitment and Internal Placement; Pre-Employment Screening including NACLCL, LAC, SSBI, SSBI-PR, and Misconduct Investigations; Position Classification; Personnel Actions; Training; Employee Assistance; Employee Relations; Outplacement.

Review and Integration Services

Special Item Number (SIN) 595 23

Function review of the human resources department and other offices relating to the implementation function outsourced; Integrator acts as program manager to connect and integrate the various functions performed by multiple contractors.

Temporary Support Services – Clerical and Professional

GSA Schedule 736 III

Special Item Numbers (SIN's) 736 100, 736 200, 736 400

GSA offers a wide range of Clerical and Professional support services to meet any need.

Comprehensive Furniture Management Services – GSA Schedule Number 71 II K

Let GSA manage all your furniture needs. We can design, setup, relocate, and maintain furniture for new or existing offices.

Project Management

Special Item Number (SIN) 712 1

Comprehensive support for the design, reconfiguration, relocation and increasing/downsizing of office space and similar facilities.

Assets Management

Special Item Number (SIN) 712 2

Furniture related services for designing and installing systems to manage office furniture and related inventories to include bar coding.

Reconfiguration/Relocation Management

Special Item Number (SIN) 712 3

Furniture related services for reorganizing, consolidating, warehousing and/or opening new facilities.

Furniture Design/Layout

Special Item Number (SIN) 712 4

Services for inclusive furniture consultations, interior design and product specifications.

Packaged Environments

Special Item Number (SIN) 712 5

Complete range of furniture related services to supply turnkey integrated office solutions.

Assets Maintenance

Special Item Number (SIN) 712 6

Furniture related services for restoring, repairing, renovating, reupholstering and cleaning of office furnishings and equipment.

*Office, Imaging and Document Solutions -
GSA Schedule Number 36*

Mail Room Management Services

Special Item Number (SIN) 733 1

Daily mailroom administrative services including accepting and distributing incoming mail and courier deliveries. Process outgoing mail, metering flats, letters, packages, etc.

For more information on each of these products and services, go to GSA Schedule's E-Library at fss.gsa.gov/schedules and search by Schedule Number, Schedule Title or SIN Number.

Office Supplies and Related Items

GSA's Personal Desk Kit

Get work stations up and running fast. A complete personal desk kit includes everything an employee needs to get the job done.

A Renewed Commitment

We are proud of our ability to support our customers during times of crisis, but GSA is also committed to providing quality service and fulfilling our customer's needs on a day-to-day basis. With this in mind, we renew our pledge to you:

"Anytime. Anyplace. Wherever you need us, we'll be there.

Whatever you need, however fast you need it, we'll get it for you.

We'll do everything we can because your success is our success."

Our mission is to help you complete your mission in the most efficient and cost effective manner, and we welcome your comments. If you would like to offer feedback regarding your experiences with GSA, call our National Customer Service Center at (800) 488-3111 or e-mail us at gsa.advantage@gsa.gov.

Schedule

Bringing to the Federal government, our private sector experience
in the delivery of **innovative** and integrated solutions

**General Services Administration
Federal Supply Schedule—FSC Group 520**

**“Financial And Business Solutions”
Contract No. GS-23F-8152H**

For the fourth year in a row, Ernst & Young is the proud recipient of the Most Admired Knowledge Enterprises (MAKE[™]) Award, celebrating companies that best incorporate the use of knowledge. E&Y's success has always been based on a culture of continuous learning. After all, the better our insights, the better your solutions. And that makes everyone a winner.

 **ERNST & YOUNG**

FROM THOUGHT TO FINISH.[™]

PROTECTING TOMORROW'S ENVIRONMENT TODAY...

► **Commitment Statement...**

In the world of high-tech finishes, there is only one leader:

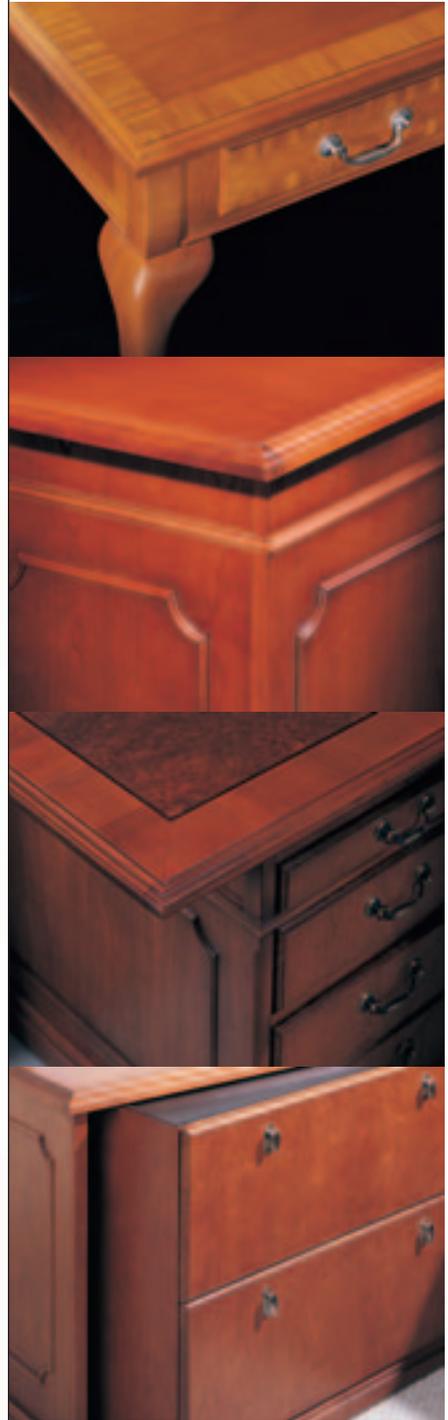

Rel-Viron® - a low Formaldehyde, high temperature cured finish. Dar•Ran has been protecting both our natural and work environments since 1996 by manufacturing 100% of all products with **Rel-Viron®**.

► **Facts About Rel-Viron®...**

- Low Formaldehyde - meets US ANSI Formaldehyde Emissions Standards, 0.20 ppm and European E-1 standards for Formaldehyde Emissions, 0.10 ppm
-  approved Fire Retardant - built in protection resists the spread of flame
- High temperature cured - no off-gassing or carton marking
- Unsurpassed durability - extremely resistant to stains and surface damage
- High solids for excellent grain fill - repairable surfaces
